

**N.S.S. COLLEGE, OTTAPALAM
ANNUAL REPORT FOR THE ACADEMIC YEAR 2018-19**

P.G. DEPARTMENT OF ENGLISH

ACTIVITIES OF THE DEPARTMENT

The department has always been keen in providing ample opportunities for its faculty and students to take part in academic workshops and seminars which will enhance their knowledge in the field of language and literature.

1. With the same intention, in October 2018, it arranged a bridge course for the first-year Undergraduate students “**Through the Looking Glass: An Odyssey into the Magical World of Literature**”, with Ms. Maya Davi Chalissery, Assistant Professor of English, Vimala College (Autonomous), Thrissur as the Resource Person.

2. In December 2018, the Department hosted a two-day State Symposium “**Versatile Theatre of the Present: Trends and Possibilities**”, in association with Kerala Sangeetha Nataka Akademi. By also encouraging the teachers and students to participate in seminars and conferences elsewhere the department continues its tradition of being a platform which promotes free thinking and sharing of ideas without limitations.

About the Department

Computer Science was started as a subject of study at the subsidiary level for B.Sc. Mathematics and B.Sc. Physics in the year 1988. In 1995, B.Sc. Computer Science programme was started with Mathematics and Electronics as the complementary subjects. The department of Computer Science was established in the year 1996. Later Computer Science was introduced as a subsidiary subject for both B.Sc. Chemistry and B.Sc. Industrial Chemistry. In 2013, M.Sc. Computer Science was started with an intake of 12 students. The department is well equipped with competent faculty.

Computational Intelligence

Computational intelligence is a way of making a computer, a computer-controlled robot, or software think intelligently as humans think. Research associated with artificial intelligence is highly technical and specialized. The core problems of artificial intelligence include programming computers for certain traits such as Knowledge, Reasoning, Problem solving, Perception, Learning, Planning, Ability to manipulate and move objects. The purpose of this conference is to promote research in the field of Artificial Intelligence & Scientific exchange among AI researchers, practitioners, scientists, engineers in affiliated disciplines.

Data Analytics

"Data Analytics refers to qualitative and quantitative techniques and processes used to enhance productivity and business gain." Data is extracted, acknowledged and bifurcated to identify and analyse behavioural data, techniques and patterns can be dynamic according to a particular business's need or requirement. Data Analytics is a broader term that has analysis as a subhead and analytics is basically the concepts used to do the analysis. Data Analytics is no more a surprising concept for a student to study as there is an explosion of tech tools that are available to make sense and also the industry is growing rapidly. Tech tools are available to make sense of institutional data which will help in further innovation. There is need of more and more institutional research and there is so much scope for exploration that the budding curiosity has also made this field an Haute course.
